THE ELECTRICAL WORLD AND ENGINEER

106083

A WEEKLY REVIEW OF CURRENT PROGRESS IN ELECTRICITY AND ITS PRACTICAL APPLICATIONS

VOLUME XXXVII

FROM JANUARY 5 TO JUNE 29, 1901

NEW YORK
ELECTRICAL WORLD AND ENGINEER

INDEX TO VOLUME XXXVII

GENERAL ALPHABETICAL INDEX

NOTE.—*Entries from the Digest of Current Electrical Literature are indicated by D. (Digest) and D. R. (Digest Reference.) Illustrated Articles are indicated by*.*

A

Accidents, Assistance in. By Charas. (D. R.) 250.
——Electric shock. By Cottrell. (D. R.) 527.
——as a livelihood, 447.
Accident records. 1075.
Accumulators. (See also storage batteries).
——Reuterdahl, 325*. By J. H. West, (D.) 836.
——Lead. Gas polarization in. By C. J. Reed, (D.) 451.
Accumulator. Lead. Increasing the capacity of, by heating, (D.) 1028.
——Internal resistance of the. By Dolezalek and Gahl, (D.) 369.
——Sulphuric acid in the, (D.) 738.
——Plates. Active material for. Jungner patent, 522.
——Tests, (D.) 836.
Acetylene, 1023.
Acid. Sulphuric. In the lead accumulator, (D.) 738.
Acoustic and electric constants of the telephone. By Wien, (D.) 987.
Agriculture. Electricity in, (D.) 652.
Air subjected to Roentgen rays. By Villari, (D.) 487.
Alaska cable, 747.
Alaskan lighting deal, 328.
Alkalies and chlorine. Electrolytic production of. By J. B. C. Kershane, (D. R.) 1082.
——Estimating free. By Von Huber, (D. R.) 285.
Alkali chlorides and nitrates. Conductivities of aqueous solutions of. By Kohlrausch and Maltby, (D. R.) 1082.
and chlorine. Electrolytic. Merry and Noble patent, 1024.
——process. By Kershaw, (D.) 649*.
——Electrolytic, (D.) 249.
Alkaline metals. Electrolytic production of. By Fischer, (D. R.) 99.
Alloys of cast iron and aluminum. Magnetic properties of. By Richardson and Lownds, (D.) 1081.
——Magnetic properties of. By Richardson and Laws, (D.) 525.
Alloy for standard resistances. New. By Van Aubel, (D.) 135.
Allotropic forms of silver. By Berthelot, (D.) 836.
Alternators.
——Compensated compounded, 664.
——Compounding of. By compensating exciter. By E. J. Berg, 676*.
——Design of. By Fynn, (D.) 204.
——European types of high tension. By C. F. Guilbert, 113, 154, 194, 231, 274, 302, 352, 398.
——High tension, 3, 147.
——Large. By Heyland, (D.) 51, 97 (D.) 282; Giles, (D.) 936.
——In parallel, (D.) 937.
——Maintaining in synohronism. Young patent, 646.
——Three-phase. Theory of. By Neithammer, (D. R.) 608.
Alternator. Determining the slip of induction motors and the co-efficient of non-uniformity in the evolution of an. By Hospitalier, (D.) 246.
——Test of steam. By Applebeer, (D.) 97.
Alternator. High frequency, 1120.
Alternators. Engines for parallel operating of. By Trinks, (D.) 1122.
——Voltage drop in polyphase. By Rey, (D. R.) 1121.
Alternating currents. Chromium cell for the rectification of. By Morgan and Duff, (D.) 207.
——Electrolytic rectifier for, 777.
——With self-induction coils. Rectifying. Zell. Puerthner, (D.) 485.
——And voltages in the same phase for fictitious loads. By Duddell, (D.) 370.
——And voltages in the same phase for fictitious loads. Obtaining. By Campbell, (D.) 285*.
——Current circuit. Measuring the power of an, (D.) 452.
——Circuits. Frequency equalization on. Berg patent, 1076.
——Diagrams, (D. R.) 322.
——Machinery. Testing of. By Townsend, (D. R.) 51.
——Measurements. By Campbell, (D.) 986*. By Addenbrooke, (D.) 987.
——Meter, (D.) 285*.
——Station, St. Petersburg. By Baker, (D. R.) 451.
Alternating Current. Swith. High tension. By Bainville, (D. D.) 938.
——Wattmeter. By Drysdale, (D.) 568.
——Wares. Recording. By Laws, (D. R.) 416.
——Work. Capacity in. By De Hoor, (D.) 368.
——Working. Capacity in. By Mordey, (D.) 247, 283; Ayrton, (D.) 249, (D. R.) 451, (D.) 487.
Aluminum.
——By Leeds, (D.) 249.
——Alloy, 482.
——Anode. Behavior of the. By Bartorelli, (D.) 986.
——In Canada. Manufacture of, 49.
——Conductors. By J. B. C. Kershaw, (D.) 248, (D.) 567.
——For power distribution. By Hoopes, (D.) 206.
——Electrical transmission lines. Italian, 198.
——Electrolytic refining of. Hoopes' patent, 776.
——Electrode. By Bartorelli, (D.) 650.
——Houses, 446.
——For lines, 625.
——Magnetic properties of cast iron containing. By Schneitzer, (D.) 938.
——Soldering of, (D. R.) 873.
——Welding. Schmidt patent, 734, (D. R.) 610.
American Steel & Wire, 253, 420.
——Telephone, 253.
——Telephone & Telegraph, 1036-7.
Ammeters. Switchboard connections for standardizing. By T. W. Freet, Jr., 405.
Ammeter. Plug cut-out. Grabosch patent, 522.
——Shunts. By F. W. Roller, 484.
——And coltmeter with adjustable field. By Menges, (D.) 875.
Ammonia. Liquid. Solutions in. By Legrand, (D. R.) 285.
Ampere's portrait, 128.
Anchors for electric wiring poles. By Carpenter, (D.) 781.
Anemometer. Electric. By Legrand, (D.) 526.
Anglo-German courtesies, 777.
Anode. Behavior of the aluminum. By Bartorelli, (D.) 986.
Anti-coherers. By Marx, (D.) 415.
Aqueous solutions of alkali chlorides and nitrates. Conductivities of. By Kohlrausch and Maltby, (D. R.) 1082.
Arc lamps.
Arc lamp, (D.) 937.
——Inclosed, 879.
——New designs of Falcon, 251*.
——Light. Bremer, (D.) 779.
——Electrolytic. By Mueller, (D.) 736.
——New electric. By Rasch, (D.) 413*.
——Lighting, (D.) 609.
——In Chicago, (D.) 52.
——Cost of, 129.
——From constant pressure mains. By Adams, (D.) 413.
Arc. Arons mercury. By E. C. Roberts, 1108*.
Arcs. Open and enclosed. By Hoppe, (D.) 485.
——Direct current. By Duddell, (D.) 52, 97.
——Electric. by Child, (D.) 683. Bermbach, (D. R.) 781, 938.
——Enclosed. Performance of the, 1006.
——Phenomena. Direct current, (D.) 134.
Argentine electrical imports, 786.
Armatures.
Armatures. New construction of. Lasche patent, 681.
——Resistance of short circuit. By Heubach, (D. R.) 1026.
——Surface-wound and slot-wound. By Heldt, (D. R.) 523.
——Weak fields and grounded. By Berry, (D. R.) 652.
——Windings of drum. By Burnie, (D. R.) 1079.
Armature. Induction motor, (D. R.) 648.
——Motors. Double wound, 172.
——Short-circuited. By Osnos, (D.) 485; Fischer-Hinner, (D. R.) 608.
——Windings. Slotted direct current. By Rothert, (D.) 778.
——Winding. Tunneled. The. By C. E. L. Brown, 281.
Armstrong. Lord. Death of, 49.
——In memory of, 482.
Aromatic substances. By Elbs and Silbermann, (D. R.) 939.
Arson cases. Electricity in, 470.
Association. American Street Railway, 405, 519.
——Canadian Electrical, 364, 1109.
——Chicago Electrical, 94.
Association. Electrical. Iowa, 244.
——Engine Builders', 864.
——Northwestern Electrical, 95, 145, 159, 1024.
——Ohio Electric Light, 871.
——Southwestern Gas, Electric and Street Railway, 520.
Association. Master Mechanics', 1128.
——Pacific Coast Electric Transmission, 1118.
Atoms. Bodies smaller than. By J. J. Thomson, (D.) 835.
Atomic fragments, 906.
Austria. Alternating current development, (D.) 415.
Austrian discrimination, 1090.
Autos in England. American, 1131.
Automatic controller handle, (D.) 834.
Auto-commutator. Telephone, (D. R.) 323.
Automobiles. Size of wheels for. By Luxenberg, (D.) 1122.
Automobiles.
——By De Contades, (D. R.) 524; Mueller, (D.) 737.
——American electric, 318.
——Army, 1078.
——Batteries for. By Fay, (D. R.) 1027.
——Buffalo mail, 483.
——Central stations and 768.
——Charging facilities for, 974.
——In Chicago, 429.
——Electric. By Joel, (D.) 168; Simons (D.) 872.
——New England, 136.
——New York City, 830.
Endurance tests for, 162.
——On ferry boats, 130, 192.
——As "first aid," 482.
——For hire, 261.
——A failure in Chicago. Electric, 444.
——High capacity storage battery for. By Fabre (D.) 283.
——Homes and, 342.
——Industry in the United States, (D. R.) 683.
——In Massachusetts. Failure of public electric, 561.
——Muffler for grass, 288.
——At the Pan-American, 838.
——In Paris. By Cottrell, (D. R.) 1080.
——Vs. trolley cars. By Adams, (D.) 652.
Automobile. The. By H. H. Eames, 41; Holson, (D.) 414.
——Batteries. Regulating the voltage of. By Weber, (D.) 133.
——Bus fad. The, 49.
——Club of America, 264.
——New headquarters for the, 315.
——Annual dinner, 666.
——Charging station (D.) 523.
——Competition in Berlin, 198.
——Construction. By P. K. Stern, 448; Clement, (D. R.) 1027.
——Driving mechanism. By J. C. Henry, 366*.
——Electric. In Paris. By H. O. Berg, 102.
——"Electrolette" of the Krieger type, (D. R.) 1080.
——Police patrol, 288.*
——Endurance test, 448.
——Buffalo, 563.
——The long distance, 731.
——Exchange and storage plant. New, 137*.
——Exhibition, (D. R.) 1027.
——Lecture, 340.
——Legislation, 308.
——New York, 730.
——For the library of Congress, 691*.
——Long trip on an, 564.
——Mail, 916.
——Service. Pan-American, 944.
——New station, (D. R.) 873.
——Notes, 527.
——For postal use, 95.
——For royalty, 606.
——Running gears, 63*.
——Service. The Washington, D. C., 151*.
——Sleigh, 564.
——Show at Chicago Coliseum.
——French, 202, 279.
——Philadelphia, 287*.
——Speed, 673, 735.
——Limiting, 365.
——Trials, (D.) 133, (D. R.) 450.
——Trolley Line in Germany, 869.
——Two wheeled electric, 783*.
——Wagon, (D. R.) 566.
——Washington to Baltimore by, 994.
Automobilism at the Pan-American Exposition, 392.
——Status of, 501.
——In the United States, 923.
Automobilists. Long Island, 165.
Autoxidation. By Haber, (D. R.) 370.

B

Baggage and express. N. Y. Handling by electricity, 1021.
Ballistic galvanometer. By Robertson, (D. R.) 685.
Bank building. Electric installation of a, (D.) 1080.
——Run. A novel, 366.
Barbados, 255.
Barcelona, Spain, 493.
Batteries. (See also storage, dry).
——For automobiles. By Fay, (D. R.) 1027.
——Copper cadmium. By T. J. Fay, 777.
——In central stations. By Abraham, (D. R.) 738.
——Gas. By Haber, (D.) 54.
——Primary. By Reynier, (D.) 684.
——Storage. By West, (D.) 611*.
————Acid for. By Heinz, (D. R.) 526.
————Calculation for installations. By Suchy, (D. R.) 99.
————Capacity of, (D.) 525.
————Central station. By Lunn, (D. R.) 1027.
————Comparative data of, (D. R.) 1082.
————Elastic materials in, (D. R.) 249.
————Electric power stations. By Highfield, (D.) 1027.
————Influence of upon railway generating apparatus. By Hull, (D.) 205.
————In traction stations, (D.) 283.
————Old. By Levermann, (D. R.) 526.
————Pastes for plates. By Peters, (D. R.) 169.
————Power transmission. For. By Latour, (D.) 524.
————Sanitary regulations for manufactories. By Heffter, (D. R.) 249.
————Stationary. By Schindler, (D. R.) 526.
————Testing, (D.) 53.
————Traction plants. By Grindle, 487.
————Transfer apparatus for. Mailloux patent, 317.
——"Short-circuit diagrams" of. By M. U. Schoop, (D.) 1123.
——Switch for charging. By Joseph, (D. R.) 1122.
Battery, Primary. Bi-sulphate of mercury, 744*.
————New. Sittig patent, 1025.
————Two liquid regenerating, 447.
——Stimulant. A, 484.
————Auxiliaries. By Lamar Lyndon, 972, 1015*, 1071*, 1112.
——Storage. By A. Treadwell, Jr., 38; Wade, (D.) 249, (D.) 684.
————Booster system. Entz patent, 564.
————Calculating for a given output. By Dr. K. Norden, 396*.
————Charging. Parshall patent, 1076.
————Copper cadmium. By Gahl, (D.) 874.
————Edison, 364, 539, 542*, (D. R.) 568, (D.) 1081.
————Electric, 454, 530.
————Formation of plates. By Carro Cao, (D.) 322.
————High capacity, for automobiles. By Fabre, (D.) 283.
————Lead-zinc, (D.) 322.
————Maintenance. By T. J. Fay, 550*.
————Manufacturing plates, (D. R.) 249.
————New Edison. By A. E. Kennelly, 867*.
————New, 1077.
————Porosity in plates. By Fay, (D.) 986.
————Tests, 838.
————Theory of the. By Kendrick, (D.) 568.
——Telephone. New common, 325*.
————Edison. On theoretical concentration changes in the new. By E. F. Roeber, 1105.
——Storage. Electro-chemical theory of the Edison, 1098.
————Patents. Buckley, (3). Menges, Apple, Abbey and Altmos, 1108.
————Plant of Lansing, Mich., street railway. By T. J. Fay, 1125*.
Baudot system. By Grallert, (D. R.) 739.
Bay Counties Power Company, 746.
Becquerel rays. By Rutherford, (D.) 986.
Behrend, Mr. B. A., 201.
Bell floor tread. Electric, 1033*.
——Telephone of Canada. Increase of stock, 491.
————Output, 104.
Belt-gearing. By Schindler, (D. R.) 937.
Bending rolls. Electrically driven, 614*.
Benzidine. By Loeb, (D. R.) 986.
Berliner decision. The, 389, 429, 445, 1097, 1133*.
————Notes on the, 480.
——On telephone transmitters and exchanges, 1073.
Bills. British power. By Magden, (D. R.) 524.
Biographical, (D. R.) 250.
Birkenhead. Lighting and traction plants, (D.) 567.
Birmingham, Ala., bonds, 1088.
——Railway, Light & Power Company. Mortgage, 103.
Blackwell & Company, 1132.
Blaze currents and life, 794.
Blast furnace gas. Power from, (D.) 132.
Bleaching. Electric. By Oettel, (D.) 53; Engelhardt, (D. R.) 249.
——Electrolytic, (D.) 322. By Brochet, (D. R.) 568.
Blind and deaf, 482.
Blizzard and wind. Damages by, 483.
Blue Island. Lighting plant, (D.) 523.
——Printing by electric light, (D. R.) 1026, 1077.
Boats.
——Electric. By Ehnert, (D.) 937.
——Holland submarine. For England, 474.
————Torpedo, 364.
Boats. Submarine, 254.
————French, 646.
————Manning the, 127.
————Mr. Holland on, 666.
————None for Germany, 446.
————Norway, 448.
————Pres. Loubet praises, 962.
————Report on, 76.
————By Weber, (D. R.) 1027.
————French, 125*.
————German, 647.
————Italian, 933.
————Russian, 928.
Boats. Submarine. Improving, 1119.
Boiler draft. Mechanical, 290*.
——feeder. Automatic steam, 576*.
Bolometer. By Kurlbaum, (D.) 416.
Boron and silicium filaments. By Blondel, (D.) 566.
Book Reviews.
—American street railway investments, 1901, 739.
—Chemistry. An introduction to modern scientific. By Dr. Lassar-Cohn, 286.
—Coal and metal miners' pocketbook, 286.
—Cost Reaper. The, 324.
—Electric lighting. By F. B. Crocker, 940.
Electrical designs, 1125.
—Elektrometallurgie und galvanotechnik. By Dr. F. Peters, 101.
—Handbuch der elektrischen accumulatoren. By Von Paul Schoop, 101.
—Engineering practice and theory. By W. H. Wakeman, 1030.
—Impianti di Illuminazione elettrica. By E. Piazzoli, 782.
—Inspector and trouble man. By A. E. Dobbs, 782.
—Instruments, et methodes de mesures electriques industrielle. By H. Armagnat, 988.
—Jahrbuch der elektrochemie. By Von W. Nernst and W. Barchers, 101.
——Fur elektrochemie. By W. Knapp, 988.
—Kalender fur elektrochemiker. By Dr. A. Neuberger, 876.
—L'Annee electrique. By Dr. Forean de Courmelles, 782.
—Lecons d'Electrotechnique General. By P. Janet, 371.
—Lezioni di eletrotecnica, 136.
—Les phenomena electriques et leurs applications. By H. Vivarez, 941.
—National Electric Light Association, 286.
—Rapports presentes au Congres International de Physique. By C. E. Guillaume and L. Poincare, 323.
—Saw-filing and management of saws. By R.
—Saw-filing and management of saw. By R. Grimshaw, 782.
—Steam boiler economy. By Wm. Kent, 1030.
—Technical, industrial and commercial vocabulary. By E. Hospitalier, 250.
—Theory and calculation of alternate current phenomena. By C. P. Steinmetz, 417.
—Theory of commutation, The. By C. C. Hawkins, 686.
—Theory of electrolytic dissociation and some of its applications. By H. C. Jones, 940.
—Theorie und praxis der analytischen elektrolyse der metalle. Neumann, 170.
Boston consolidation, 291, 329, 578, 1130.
——Edison, 328.
——Electric light, 139.
——Lighting situation, 212.
——Notes, 1036.
Bournemouth, Eng. Traction contracts, 381.
Brake invented by Planta, (D. R.) 683.
Braun cathode tube. Lecture experiments with a. By Simon and Reich, (D.) 567.
Brazil. Companhia Mineira de Electricidade, 330.
——Electrical apparatus in, 380.
——Electricity in, 201.
——Hoisting machinery for, 998.
——Projected electric railways, 104.
Bremer arc light, (D.) 779.
Bridge. An electric, 317.
Bridgetown, Barbados, 422.
British Columbia, 140.
——Power development in, 762.
——Governmental world telegraph system, 76.
——Lighting plant. Small, (D. R.) 99.
——Municipal plant. Petersborough, (D.) 567.
——Pacific cable, 199.
——Tonnage decrease, 786.
——Traction equipment, 292.
——Transformer practice, 371*.
——West Indies. Electrical developments in the, 406.
Brooklyn Rapid Transit, 531, 693, 1089.
Brush adjustment automatic. Parsons and Stoney patent, 483.
——Discharge. By Bryibam, (D. R.) 874.
Brush-holder. Socket carbon, 1129*.
Bucket shops, 521.
Buffalo & Niagara Falls Electric Light & Power Company, 139.
——Railway Company earnings, 880.
Bulkhead doors. Electrically controlled. By Walsh, (D. R.) 833.
Bullock and Wagner Selling arrangement, 653.
Bunsen. By Ostwald, (D. R.) 1030.
Bureau. Standardization, 411.
——Technical. German, 1077.
Burglars. Protecting railroads against, 359.
"Busy." Telephone data, 164.
Butte, Mont. Notes on electric light and power work at. By J. R. Cravath, 149*.

C

Cables, (D. R.) 284.
——Concentric. By O'Gorman, (D. R.) 99.
————Self-induction and capacity in a network of. By Julius, (D.) 487.
——Disappearance of. In New York, 831.
——French submarine, 871.
——High tension. By E. K. Scott, (D.) 524.
——Insulation on. By O'Gorman, (D.) 567, 610, 683.
——Joining aluminium, (D.) 369.
——Ocean. By Marsh, (D. R.) 524.
——Pacific. In favor of, 76.
——Phillipines. New, 95.
——Submarine. More, 165.
————Telegraph. By Casevity, (D.) 370.
——Underground. By Devey, (D. R.) 738.
————Electric. Locating faults in, 446.
Cable. Anglo-German, 564.
——Anglo-Pacific, 596.
——Breakdowns. By Hanappe, (D. R.) 284.
——British Pacific, 199, 734, 919, 1078.
——Chinese, 162.
——Connections with the Madeiras, 762.
——Cost of abolishing the, 1036.
——Exit the, 905.
——Extension in Africa, 831.
——Franco-Chinese, 607.
——Hawaiian, 366.
——Inquiry. Dominion, 153.
————Imperial, 244.
——To Manila. The, 646.
——Messages. Fleecing senders of, 1077.
——Operators. British, 412.
——Pacific, 352.
————English, 483.
————New, 1023.
——Plans. French, 1078.
——Proposed German-Dutch, 235.
——Service to Brazil. The, 730.
——Story. Mr. Morgan and the, 830.
——Subterranean telegraph, (D.) 569.
——Telephone. For Governor's Island, 681.
——Telegraphy. Long distance. By Breisig, (D. R.) 286.
——Tests, (D. R.) 781.
————Instruments for. By Edelmann, (D. R.) 370.
——Testing outfit. New, 879*.
——Tolls. Little bill for, 49.
————Phillipine, 565.
——Work. By Kingsford, (D. R.) 208.
————On the Milwaukee River. Telephone submarine, 436*.
Cable telegraphy. Sine waves and—. By Breisig, (D.) 1124.
Calcium carbide. By J. B. C. Kershaw, (D.) 54, 748.
——Dr. Frolich patent, 734.
——In Europe, 228.
——Industry, (D.) 874.
——New use for, 925.
——Reducing action of. By Kuegelgen, (D. R.) 781, (D.) 938.
Calcium carbide from impure raw materials, 1115.
Calcic carbide plant in Italy, 130.
California. Electric rights in, 670.
Calculation of the maximum ampere turns which can be placed on a given spool. By Osnos, (D.) 132.
——Resistances. Motors, &c., for discontinuous service. By Oelschlaeger, (D.) 283*.
————Dissipating energy. By Girault, (D.) 284.
——Of the stray coefficient of induction motors. By Jonas, (D. R.) 1079.
Calcutta, 1131.
Calcutta dwellings, 647.
Caldwell interrupter. By Ruhmer, (D. R.) 1082.
"C. & C. series-parallel" system of motor control. By Geo. Towler, 56*.
Canada. Victor turbines for, 1131.
Canadian power schemes. New, 1119.
Canals. Development of electric traction on, 187*.
——Electric haulage on, 181.
——Lighting, 681.

Life-saving apparatus, German, 734.
Light, arc. New electric. By Rasch, (D.) 413*.
——Electric. By De Fodor, (D. R.) 937.
————Blue printing by the, (D. R.) 984, 1077.
————Canada, 245.
————Hartford, (D.) 985.
————Of the future. By E. H., (D.) 779.
————Testing networks. By Charpentier, (D.) 836.
——Mechanical equivalent of. By Carl Hering, 631.
——Incandescent. Development of the, to, 1880. By A. E. Fay, 633.
——Plant. Electric. Beckenham, (D.) 205.
————Nottingham, (D.) 206.
————Southampton. By Nicholson, (D.) 206.
————Urbana, Ill., 60*.
——And power installation on steam, "Deutschland." Electric, 909*.
——And Traction Company, American. Increase of capital, 844.
——Without heat. By Prof. R. A. Fessenden, 24*.
Light and traction. American, 1130.
Lighting. Electric. Rotherham, (D. R.) 1122.
——And traction plant. Ilford, (D. R.) 1122.
————Tynemouth, (D.) 1122.
Lightship equipment, (D.) 1121.
Lighthouse etheric signaling, 129.
Lighting, Electric.
——Arc. Beginning of the twentieth century, 929.
————London, 541.
——Bonds, Dayton, O., 614.
————Norwich, N. Y., 1036.
——Combination denied. Chicago, 948.
——Companies in New York State. State control of, 316.
——Consolidation in New Jersey, 254.
——Consolidations. New York, 655.
——Contract at Denver voided. The new, 828.
——Effects. Pan-American decorative. By F. C. Perkins, 126*.
——Electric. By Prof. D. C. Jackson, 34.
————Cham, Ger., (D.) 1027.
————Chicago, (D. R.) 1027.
————And steam heating plant combined. By Zurfluh, (D. R.) 835.
————Fulham, Eng., (D.) 415.
————Lowestoft, (D. R.) 524.
————Manchester, Eng., (D. R.) 873.
————Northwich, (D.) 321.
————Peterborough, (D.) 247.
————Sherbrooke, Can., (D.) 1027.
————Thames embankment, 509*.
————Wigan, Eng., (D.) 321.
——Fixtures. Development of. By P. W. George, 647.
——Interests. Consolidation of, in Cincinnati, 796.
————Louisville's, 996.
——Plant. Chicago, (D. R.) 369.
————Motherwell, (D. R.) 369.
————Residential. Long Island, 613*.
——Plants in New York State, 844.
——Street, 663.
————In cities, 412.
————Methods of, 703.
——St. Peters, 646.
——Vacuum tube, 201.
——Train, 606.
————(D.) 166, (D.) 246, (D. R.) 282, (D. R.) 566. By Willitschek, (D.) 736.
————Germany, 276.
——And traction plant. Wigan, Eng., (D. R.) 873.
Lightning arresters. By C. C. Chesney, 942*.
——Arrester. Wirt patent, 448.
——Damage from, 192.
——Flashes. Current strength of. By Pockels, (D.) 525.
——Protection, 757.
——Rods. By Findiesen, (D. R.) 417, (D. R.) 782, (D.) 940.
Lima, Peru, lighting station, 531.
Line construction, in Alaska. Perils of, 520.
Liquid air for fuel combustion, 606.
——E. M. F. due to the motion of a. By Zakrzewski, (D.) 53.
Litigation. Transformer patent, 733.
Living and non-living matter. Response in, (D.) 987.
Loads, fictitious. Obtaining alternating currents and voltages in the same phase for. By Campbell, (D.) 285*.
Localization of high-resistance breaks. By Rymer-Jones, (D. R.) 1124.
Lockport power schemes, 328.
Locomotives. Collecting, 129.
——Electric, (D. R.) 415, (D. R.) 873.
————And multiple driving. By Tyler, (D.) 319.
——Mining, 646.
Locomotive. Electric. By Drouin, (D.) 737.
————Car crane and, 327*.
——Jungfrau, (D. R.) 780.
——Shed. Electricity in a, (D.) 98.
London underground, 165.
——Uptorn streets, 317.
Longitudinal thermo-magnetic effect. By Lownds, (D.) 1028.
Long Island gas, 329.
Looms. Electric driving of, (D. R.) 319, 566.
Losses. Dielectric. By Drysdale, (D.) 683.
Louisville consolidation, 843.
Low resistances. Measuring, in the workshop. By Edgecumbe, (D.) 874*.
Lubricator. Gas engine, 841*.
Luminosity of gases. By Stark, (D.) 322.
Lupus. Curing, 1075.
Lux Walthour meter, (D.) 1082.

M

Machines. Modern manufacture of. By Booth, (D. R.) 367.
——Short circuit of three-phase. By Rosenberg, (D.) 872.
——Testing three-phase. By Breslauer, (D.) 937.
Machine tools for Manchester, 140.
Machinery. American. In the German market, 930.
——Electrical. French trade in, 563.
——Exposition at Frankfort, 747.
——Filipino electric, (D. R.) 570.
——Heating of electrical, under two regularly alternating conditions of load. By E. R. Douglas, 769.
——Polyphase. By Eborall, (D.) 872.
————Sub-station. By Eborall (D. B.) 648.
Madrid. Monocyclic system in. By Baswitz, (D.) 1080.
Magician. At the door of the, 1.
Magnalium. By Kaempfer, (D.) 612.
Magnets.
——Constancy of permanent. By Klernencie, (D. R.) 322.
——Testing of. By Klemencie, (D.) 451.
——Theory of permanent. By Burch, (D. R.) 610.
Magnet shields. Field-Thomas patent, 1077.
Magnetos for special work, 742*.
Magnetism. A new promised theory of, 729*.
——Remanent. By Holitscher, (D.) 248, 415.
——Terrestrial, (D.) 248, (D. R.) 610, (D. R.) 1081.
Magnetic concentration. A new departure in, 255.
——Declination. Discontinuities in, 298.
——Effect of electric charge. By Cremieu, (D.) 525.
——Expansion of iron and nickel. Shaw and Laws, (D.) 451, 525.
——Field. Rotary, (D. R.) 523.
——Rotating. Hysteresis of nickel and cobalt in a. By Beattie, (D.) 1081.
——Specific inductive capacity of dielectrics in a. By Roberts, (D.) 248.
——Hysteresis. By Krogh and Rieli, (D.) 284.
——Images. By Jaeger, (D.) 488.
——Induction. By Buchanan, (D.) 525.
——Measurements. Industrial. By Montpellier and Allamet, (D. R.) 739.
——Moment. Change of by shocks. By Kruese, (D.) 369.
——Observatories and traction disturbances. By Wedmore, (D.) 286.
——Observations. United States government, 262.
——Precession. By Schuster, (D. R.) 488.
——Properties of alloys of castiron and aluminum. By Richardson and Lownds, (D.) 1081.
————Alooys. By Richardson and Laws, (D.) 525.
——Separator, (D. R.) 136, 318.
——Separators for South America, 421.
——Separation. By Smits, (D. R.) 612.
——Tests of iron. By Kamps, (D. R.) 370; Capito, (D. R.) 416.
Magnetized chronometer. By Cornu, (D.) 54.
Magnetization. Circular. By Trowbridge and Adams, (D. R.) 568.
——Of electro deposits. By Maurain, (D. R.) 53.
Magnetometer. Constant. By Chistoni, (D. R.) 55, 100.
Magnetostriction. Torsorial. By Barns, (D.) 284.
Mail Service. Faster, 261.
——Tube systems, 146.
Mail tubes, 1119.
Mains. Constant pressure. Arc lighting from. By Adams, (D.) 413.
——Equalization. By Edelstein, (D. R.) 938.
Manchester manipulation, 212.

Manila. Lighting in, 291.
——Trolley in, 881.
Manhattan Elevated Railway. Electric plant of the, 10*, 89*.
——Railway. The, 74.
Manometric flame. Application of the, to the telephone. By Austin, (D.) 452.
Manufacturing. Heavy electrical, 755.
——Plants, (D. R.) 876.
——Nolder Bros., Eddy Electric Manufacturing Company, (D. R.) 739.
——Works. Electricity in. By Aldrich, (D. R.) 1027.
Manufactures. Exports of, 238.
Marconi-Dolbear infringement suit. The. By A. F. Collins, 599.
——Patent. A, 365, 1076.
——System and Cunard steamers, 645.
——Of wireless telegraphy, 1022*.
——Visit to United States Navy Department, 646.
——Wireless telegraph patents sustained, 508.
Mars. A new century call up from, 48.
Martian Eddy currents, 128.
Massachusetts. Consolidations in, 446.
——Electric Companies, 491.
Mather, (D.) 283.
Matter and electricity. Elementary quantities of. By Planet, (D.) 610.
Maximum ampere turns which can be placed on a given spool. Calculation of the. By Osnos, (D.) 132*.
——Demand indicator. By Hohmann, (D. R.) 323*.
——System of charging, (D.) 134.
Maxwell's Law, 110.
McKinley. President. Presentation to, 1120.
McMillin consolidation. A, 616.
Measurements. Alternating current. By Campbell, (D.) 986*; Addenbrooke, (D.) 987.
——In alternating circuits, (D. R.) 416.
——Industrial magnetics. By Montpellier and Aliamet, (D. R.) 987.
——Magnetic. By Montpellier and Aliamet, (D. R.) 569, 781.
Measurement of high temperatures. Thermo-elements for the. By Lindeck and Rothe, (D.) 526.
——Power. In alternating current circuits. By Campbell, (D.) 323.
Measuring the frequency. By Wachsmuth, (D.) 452*.
——Insulation resistance. By Rabinowicz, (D.) 416*.
——Instruments having magnets. By Weiss, (D.) 939*.
——The power of an alternating current circuit, (D.) 452.
——Slips of induction motors. By Leibt, (D.) 608; by Rosenberg, (D. R.) 608.
——The velocity of ions. By Abegg, (D.) 1028.
——The vibration of a transmitter diaphragm. Method of. By Merrill, (D.) 323.
Measuring the losses in dynamos. By Peukert, (D.) 1121; Kuhlmann, (D.) 1121; Bloch, (D.) 1121*.
——The permeability. By Lamb and Walker, (D. R.) 1124.
Mechanical applications of electricity. By Richard, (D. R.) 1027.
Meeting. Street Railway Association, (D.) 320.
Mercury. Electrolytic purification of. By Woolsey McA. Johnson, 634*.
Mercury standard for the Ohm. By Jaeger and Kahle, (D.) 1124.
Messages. Wireless Separation of. By Jegon, (D.) 100.
Metals.
——And alloys. Properties of. By Guilleaume, (D. R.) 836.
——Composition for cleaning. Bach patent, 164.
——Conductivity for heat and electricity, heat capacity, and thermo-electric power of certain. By Jaeger and Diesselhorst, (D. R.) 1081.
——Deposition of, from mixed electrolytes. By Lehfeldt, (D. R.) 249.
——Electric pulverization of. By A. Z., (D.) 1030.
——Electrical heating of. By De Tunzelmann, (D.) 685.
——Electron theory of. By Deude, (D.) 99.
——Estimation of, by electrolysis. By Nathan, (D. R.) 488.
——Normal electrodes and the absolute potentials of. By Ostwald, (D.) 488.
——Pure. Restivity of. By Van Aubel, (D.) 938.
Metal. Equilibrium between the different oxidation states of a. By Abel, (D.) 1082.
——Market, (D. R.) 170.
——Papers. Electrolytic manufacture of, 1074.
Metals and non-aqueous solutions. Potential between. By Kahlenberg, (D.) 1123.
Metallic deposits. Solubility of. By Immerwahe, (D.) 526.
——Reflection of electric waves. By Lindmann, (D.) 684.
Metallurgy of aluminum. Blackmore patent, 983.
Metallurgical plant. Electric installation of a. By Gohs, (D.) 134.
Meters.
——By Janet, (D. R.) 836. Armagnat, (D. R.) 1029.
——Adjustment of induction, (D.) 416*.
——Electric. By Janet, (D.) 738.
——Motor, (D. R.) 781.
——Phase. By Armagnat, (D. R.) 569.
——Prepayment. Walthour, 411.
——Testing alternating current. By Orlich, (D. R.) 416.
——Direct current. By Feussner, (D.) 135.
——Three-phase. By Stern, (D. R.) 739.
Meter alternating current, (D.) 285*, 756.
——Direct current. Small, (D.) 939*.
——For double tariff, (D.) 781. By Aron, (D. R.) 940.
——For four-wire, three-phase system. By Aron, (D.) 611*.
——Frequency, (D.) 55.
——Lux. Walthour, (D.) 1082.
——Patents. King, Fish, Jameson patents, 607.
——Phase. By Johonnott, (D. R.) 782.
——Testing. By Smith, (D. R.) 875.
——Walthour. By Holden, (D. R.) 1089.
Metropolitan of Chicago, 291.
——Underground. Equipping the London, 561.
Mexico. C. & C. Company, 329.
——City, 1038.
——Electrical machinery for, 748, 1037.
——Traction in, 881.
——Traction in, 579.
——Water power in, 214.
Mexican Sugar Refining Company, 950.
——Telephone, 329, 491.
——Telegraph Company. Financial, 103.
Mica. Effect of oil on the insulating qualities of. By Maloney, (D.) 207.
Mile span. Four-fifths of a, 734.
Military engines of the future, 46.
Milling machine. Improved hand, 211*.
Milwaukee convention. Exhibits at the, 170*.
Mines. Electricity in (D. R.) 449, 1075.
——Electricity in mountain, 702.
——Firing, (D. R.) 55.
Mine. French. Electric installation in a. By Davies, (D.) 984.
Miners' Lamps. By Walker, (D.) 984.
Minerals. Locating metallic. Brown patent, 681.
Mineral and metal output of the United States in 1900, (D.) 135.
Minneapolis General Electric, 254.
Mississippi Valley Telephone, 213.
Monocyclic system in Madrid. By Baswitz, (D.) 1080.
Montreal. Consolidation in, 121.
——Electric combination in, 482, 446, 605.
——Electrical interest in, 559.
——Street Railway Company, 580.
Mortgages, 880-1.
——Delaware $1,000,000, 655.
Moscow trolleys, 213.
Motors.
——Direct current power, 453*.
——Synchronous alternating current motors and, (D.) 282.
——Double wound armature, 172.
——Electric. Speed regulation of. By Wheeler, (D.) 648.
——For factories. Universal, 377*.
——Friction and hysteresis losses in three-phase induction. By Hissink, (D.) 608.
——Induction. By E. H., (D. R.) 1026. Eborell, (D.) 1026.
——And their kin, 1060.
——Calculation of the stray coefficient of. By Jonas, (D. R.) 1079.
——Determining the slip of, and the coefficient of non-uniformity in the revolution of an alternator. By Hospitalier, (D.) 246.
——Measuring the slip of. By Seibt, (D.) 608. By Rosenberg, (D. R.) 608.
——Mr. Scott on, 704.
——Operation of cranes by, 251*.
——Starting single-phase under load. By Osnos, (D.) 936*.
——Tobacco factory. By Bausch, (D. R.) 319.
——Polyphase. Hoisting, (D.) 1026.
——For pumping. Single-phase, 944*.
——Railway. Capacity and rating of. By Storer, (D.) 133.
——Control of. By Sieber, (D. R.) 321.
——Sparkless disconnection of. By Mussovitz, (D. R.) 779. Krause, (D.) 608*.
——Wound. Speed regulation of. By Stock, (D.) 1026.
——Starting resistance for direct current. By Bunet, (D.) 778.
——Three-phase. By Krebs, (D.) 367*. Bergmann, (D.) 682.
——Synchronous. By Colard, (D.) 485.
——Means for preventing hunting of. Buck patent, 244.
——Three-phase. By Goldschmidt, (D. R.) 872.
——Induction friction and hysteresis losses in. By Dettmar, (D.) 778.
Motors and alternators in parallel. Synchronous. By Russell, (D. R.) 1121.
Mortor cars using two and four motors per car. Power consumption of, (D.) 834.
——Car. Tourist, 995.
——Control. By Lieber, (D. R.) 450.
——Waddell patents, 164.
——Controller, 210*.
——Automatic elevator, 58*.
——Diagram. Induction. By Sumec, (D. R.) 937.
——Electric Railway. Priest patent, 94.
——Fans. Development of. By A. D. Adams, 350.
——Generators and synchronous converters. By Perkins, (D. R.) 52.
——Generator. English polyphase direct current, 571*.
——For small general power service. The polyphase induction. By R. D. Mershon, 906.
——Induction, (D.) 166*, 957.
——Effect of self-induction in the rotor of an, (D. R.) 833.
——Rotary field electrostatic, 1006, 1012*.
——Jenney lintoype, 837*.
——Meters, (D. R.) 781.
——Modified induction. By Osnos, (D.) 778.
Motor—(Continued).
——Multi-speed polyphase. Lamme patent, 934.
——Railway, (D.) 737.
——Regulaton. Burke and Wheeler patents, 831.
——Sewing machine, 740*.
——Starter, 150 H. P., 528*.
——Automatic, 529*.
——Trolley. By Short, (D. R.) 683.
——Without brushes. Self-starting single-phase. By J. Fischer Hinnen, 1066*.
Motor induction modified. By Grob, (D.) 1121; Bauch, (D. R.) 1121.
Motormen. School for, (D. R.) 321.
Mortgage. York Haven, 1037.
Multiple driving electric locomotives and. By Tyler, (D.) 319.
——Unit system. The Sprague. By Sprague, (D.) 834.
Multiplex telegraphy. By Giltag, (D.) 417; Luginbuehl, (D. R.) 569.
Municipal.
——Berlin tramways, 491.
——Debts, American, 312.
——Electricians, 520, 934.
——League. National, 776.
——Light in Montreal, No. 280.
——Ownership, 160.
——Amenities, 604.
——English, 871.
——Public accountant on, 774
——Plants. Are they profitable? By M. J. Francisco, 198.
——Plant. Massachusetts, A, 1078.
——South Norwalk. By A. E. Winchester, 281.
Municipalities' liability, 95.

N

Names great in science and invention during the nineteenth century. Twenty-five (with portraits), 18.
Nashville trolley's default, 1130.
Nassau electric gold bonds, 291.
National Carbon Company, 379.
Navy yard draughtsmen, 681.
Naval gun circuits, (D. R.) 98.
Nernst lamp. (See also lamps.)
——By Nerust and Wild, (D.) 97, (D.) 132, 165, (D.) 566. By E. H., (D.) 736*, (D.) 833*, (D.) 937.
——At Hartford, 870.
——Heater for, 365.
——Van Vleck and Stevens patent, 1025.
——Pre-heater, (D.) 779*.

Party line privacy device. Barrett patent, 202.
Party lines. West system of. By Ruhmer, (D.) 55*.
Particle. Electrified. Motion of an. By Riecke, (D.) 248.
Paris Exposition. By Feussner, (D.) 652; Rey-Val., (D.) 652; Korda, (D.) 652; Ruhmer, (D. R.) 1125.
——Accumulator. By Reyval, (D. R.) 250.
——Alternators. By Reyval, (D.) 371; Sander, (D.) 371; Montpellier, (D. R.) 489; Korda, (D. R.) 739.
——Alternators, clock, dynamos. By Reyval, (D. R.) 489.
——French. By Korda, (D. R.) 323.
——Alternator with Leblanc's "amortisseurs." By Korda, (D. R.) 417.
——Alternator; storage battery. By Reyval, (D. R.) 136.
——Alternating current machines. By Girault, (D. R.) 250, 417.
——Aluminum exhibits. By Richards, (D. R.) 286.
——Arc lamp. By Bainville, (D. R.) 136.
——Arc lamps, alternate, lighting the Eiffel Tower. By Reyval, (D. R.) 286.
——Cranes. By Horner, (D. R.) 286.
——Crane, forge, arc lighting machine, (D. R.) 323.
——Direct and alternating current machines. Traveling platform. By Reyval, (D.) 940.
——Dynamos. Alternators. By Montpellier, (D. R.) 901.
——Dynamos and transformers of. Ganz and Company. By Haussegger, (D. R.) 417; Reyval, (D. R.) 1030.
——Electro-chemistry, (D. R.) 250.
——Electric light and power service of the Exposition. By Picon, (D. R.) 876.
——Galvanometers. By Hartmann and Braun. By Montpellier, (D. R.) 286.
——Ganz and Company's exhibits. By Haussegger, (D.) 371; (D. R.) 782
——Generators, dynamos, etc. By Reyval, (D. R.) 782.
Paris Exposition—(Continued).
——Honors, 776.
——Induction coils and interrupters. Measuring instruments. By Armagnat, (D. R.) 286, (D. R.) 527.
——Launch. Electric. By Dary, (D. R.) 136.
——Measuring instruments. By Armagnat, (D. R.) 136, 489.
——Motors. By De Morsier, (D.) 371.
——Moving platform. By Jovignot, (D. R.) 739, 756.
——National Electric Company of Vienna. Ruhmkorff coil, (D. R.) 208.
——Railway signals. Electric. By Larezzari, (D.) 371.
——Registering apparatus. Telephone switchboard. By Montillat, (D. R.) 101.
——Report, 1025.
——Rieter regulator. By Soulier, (D. R.) 250.
——Storage batteries. By Heim, (D. R.) 250.
——Students' report on bi-polar machines. By Lloyd Pearson, (D. R.) 208.
——Telegraph and telephone exhibits of Siemens and Halske. By Ruhmer, (D.) 940.
——Telephone exhibits of the British Post Office, etc., (D. R.) 988.
——Voltmeters and wattimeters. By Allamet, (D. R.) 101.
——Wattmeter. By Bainville, (D. R.) 250.
——Worthington pumping installation, (D. R.) 837.
——General Omnibus Company, (D. R.) 835.
Patents.
——Buying. By E. R. Thompson, 983.
——Control of enclosed arc, 264.
——Declared invalid. Three important electric railway, 406.
——England, 280.
——Marconi wireless sustained, 508.
——Recent electric railway, 560.
——Split-phase motor, 317.
——Telephone line, 128.
——And trade marks. International conference on, 344.
Patent claims. Method, 341.
——Commissioner. Features of the report of, 856
——Decisions. Split-phase, 412.
——Expirations for 1901. By W. A. Rosenbaum, 362.
——Marconi, 365, 1076.
——Office. United States. Annual report, 280.
——Split field polyphase, 279.
Pearson. Sir W. D., 255.
Perchlorates. Production of, by electrolysis. By Winteler, (D.) 1123.
Permeability. Measuring. By Lamb and Walker, (D. R.) 1124.
Phaeton. Electric Stanhope, 692*.
Phase indicators. Wattmeters and, 838*.
Phasemeters. By Armagnat, (D.) 169, (D. R.) 569.
——Turning apparatus. By Campbell, (D. R.) 170; Duddell, (D. R.) 249.
Phenomena. Cosmic electric. By G. T. Fitzgerald and O. Lodge, (D.) 53.
Philadelphia Company. The, 880.
——And Westchester, 329.
Phillipines. By Rice, (D.) 135, 329, 447.
——New cables in, 95.
——Weather service in the, 1077.
Phosphorus. Electrolytic production of, 360*.
——Electrolytic preparation of, (D. R.) 285.
Phosphoric acid. Electrolytic method of manufacturing. Denbergh patent, 447.
Phosphorescent glow in gases. By Burke, (D.) 684.
Phonograph. Electro-chemical, 664, 672*.
——And telephone. The origin of the, 315.
Photometry. By Sharp, (D. R.) 781.
Photometer screens, 65*.
Photography and telephony, 1011.
Photographic alternating current curves. By Weinhold, (D. R.) 1028.
Photographone. By Ruhmer, (D.) 875.
Physical science at the beginning of the century. State of, 298.
——Society. Electric, 244.
——Quantities. Symbols for, 3.
Physicians. Roentgen rays for. By Rollins, (D. R.) 53.
Physician. Electricity and the, 366.
Physiological effects. By Walter, (D. R.) 136.
Piano electrical attachment, 49.
Pigments. Electrolytic, (D. R.) 488.
Pioneers. Passing, 701.
Pipes. Underground. Losses of heat from. By A. D. Adams, 556.
Pittsburg. Electrical development in 1900, 60.
Planets. Communication with the, 111.
—— Electrical communication with the, 114.
Platinum vs. Copper, 238.
Plants. Electric. Design of, By B. J. Arnold, (D.) 1079.
Pliers for linemen. New, 841*.
——Side cutting and splicing and insulated, 419*.
——Wiremen's, 878.
Plier. Diagonal electrical, 654.
Plow. Electric, (D.) 98.
Pneumatic tube service, 129.
——System, 365.
Point discharge from a Tesla pole. By Knoblauch, (D.) 168.
Pole lines. By Knox, (D. R.) 524.
Polarization with alternating currents. By Oliveri, (D.) 284.
Polyphase currents along parallel wires. Propagation of. By Morton, (D. R.) 874.
——Equipment of factories. By Wyld, (D.) 1079.
——Machinery. By Eborall, (D.) 872.
——Plant, Chicago, (D.) 206.
——Sub-station machinery. By Eborall, (D. R.) 648, (D.) 738, (D. R.) 833.
——Working. By Eborall, (D.) 936, 984, 1079.
Polyphase plant for traction. By Elorall, (D.) 1122.
Population. Electricity and, 963.
Portland, Me., consolidation, 578.
——General Electric Company, (D. R.) 524.
Portugal. Lisbon Tramways Company, 292.
Porosity in storage battery plates. By Fay, (D.) 986.
Positive light. Conductivity of. By Stark, (D.) 415.
——And negative ions. By Townsend, (D.) 368.
Postponement, 128.
Potassium chromate in the electrolysis of alkalies. By Mueller, (D.) 285.
Potentials. Devices for handling extreme, 1126*.
Power Company. St. Lawrence, 1110.
Per iodate of. By Mueller, (D. R.) 738.
Potash and soda. Electrolytic production of caustic. By Winteler, (D. R.) 99.
Power.
——From blast furnace gases, (D.) 52.
——Canadian. Another enterprise, 1025.
——Changing. Cost of, 986.
——Company. International, 843.
——Colorado River, 675.
——Cost of. By Brown, (D.) 414.
——Consumption of motor cars using two and four motors per car, (D.) 834.
——Development. Rochester.
——Sault Ste. Marie, 200.
——Distribution. Aluminum conductors for. By Hoopes, (D.) 206.
——Electrical, 1076.
——In factories. Direct and alternating current systems for. By Goldsborough, (D. R.) 937.
——Schemes. British, (D. R.) 1079.
——Electric. Africa, 201.
——Comstock mines, 52.
——Engineering works. By Bell, (D.) 204.
——Factories. By Philippi, (D.) 292.
——Glass plant. By Froelich, (D.) 779.
——Iron and steel works. By Walker, (D.) 319.
——Irrigation pumping at Bakersfield, Cal., 543*.
——On the stage, (D. R.) 937.
——Pipe making, 129.
——Printing establishment, (D.) 204.
——Workshops. By Geipel, (D. R.) 449, (D.) 486.
——Equipment. Packing house, (D.) 648.
——Exchange. A, 832.
——Houses in St. Louis, (D. R.) 321.
——Loss in choking coils. By Clinker, (D.) 487.
——Plant. Australia, (D. R.) 937.
——Gas, (D. R.) 872.
——Pennsylvania's new, 375*.
——Trafford, England, (D.) 567.
——United Electric Company of New Jersey. The Hoboken, 467*.
——For Philadelphia, 49.
——Shawinigan Falls, 317.
——Stations. Electric. Storage batteries for. By Highfield, (D.) 1027.
——Station design. By Dawson, (D. R.) 99.
——Transmission. Storage batteries for. By Latour, (D.) 524.
——Water. Ireland, 472.
——Switzerland. By Prasil, (D.) 984.
Precision. Elements of, 1006.
Press. Blanking. Electrically driven, 63*.
——Improving the, 316.
Pressure and temperature in the electric spark. By Haschek, (D.) 248.
——Influence of, on dielectric constants. By Koenigsberger, (D.) 985.
Prime movers. Determination of the angular displacement of. By L. Fleischmann, 920*.
Primary batteries. By Reynier, (D.) 684.
——Battery. Sittig patent, 1025.
——Cells. By Peters, (D.) 939.
Prints. Light, (D. R.) 523.
Printing. Blue. By the electric light, (D. R.) 984.
——Electro-chemical. Friese-Greene patent, 565.
——Establishment. By Griggs, (D.) 682.
——Electric power in a, (D.) 204.
——Office. Government. Electric power in the, 521.
——Telegraph. By Hitchcock, (D. R.) 782.
——Murray page, 710*.
Propagation of electric waves in water. By Gutton, (D.) 610.
Pulverization of metals. Electric. By A. Z., (D.) 1030.
Pumps. Electrically driven, (D. R.) 566.
Pump. British motor driven feed, 575.
——Direct acting pressure, 210*.
Pumping machinery. Centrifugal. Development of, 57*.
Punishment. Capital, 908.

Q

Quantities. Elementary. Matter and electricity. By Planck, (D.) 610.
Queensland, Australia, 580.
Quotation war in Chicago. The, 520.

R

Radio-activity. By Becquerel, (D. R.) 568.
——Secondary. By Becquerel, (D.) 568.
Radium rays. Secondary. By Curie and Debierne, (D.) 610.
——Transparency of metals to. By Mizuno, (D.) 206.

Radium and poloniums. Spectra of. By Berndt, (D.) 168.
Radiophone. Loud-speaking. By Tommasina, (D.) 837.
Rail bond. A new, (D.) 834.
——Bonds. Measuring the resistance of, 3.
Rails. Grinding grooves in, 490*.
Rail joint resistance. Determining. By A. B. Herrick, 96.
Railroad Company. American, 996.
Railroading. Heavy electric. Germany, (D. R.) 450.
Railway and lighting. Connecticut, 844.
Railways. Electric. Geographical.
——Basel, Switzerland. By Perkins, (D. R.) 609.
——Bologna and San Felice, (D.) 320.
——Bulgaria, 565.
